Studio Photography to Portfolio

Take good quality photos
For Design & Print 300dpi (Dots per inch)
For Web display 72dpi

Select good lightening

Avoiding stepping on the backing sheet

Have the backing sheet curved at the bottom

Extended the backing sheet on the floor

Arrangment for one shadow

Always keep a back up copy

Cut out images using the correct tools

Turning images into smart objetcs in PShop
to preserve the quality

Remember you have access to 3 sessions a week and always return the key
